How to Paint Your Rock

Learn how to paint your rocks with this simple tutorial. Use a kit provided by the Interpretive Centre or similar materials to get started!

Materials

- Rocks - smooth and flat are best
- Toxin free outdoor paint
- Paint brushes
- Water basin or bowl
- Stencils (optional)

Instructions

1. Wash your rocks to remove any dirt.
2. Allow the rock to dry before painting.
3. Plan your design in pencil first (optional).
4. Be creative! Use words, images, or designs to convey your message about why you think your community rocks.
5. Mix multiple paint colours together to make something new.
6. Paint your design. Use several coats and allow the paint to dry in between to achieve bright, vibrant designs.
7. Use small brushes or a stylus to paint details and/or dots.
8. Allow your rock to dry and add it to the mosaic!
